

KITCHEN DESIGN GUIDE

1. Initial Design Consultation (free)

Your first step to get started is by making an appointment. In your first meeting, please bring **rough measurements** (see inside this brochure), **photos of your current space** (even if it will be changing), **clippings or photo links for styles/designs you like** and **appliance sizes**. We will give you an in-depth education using our many showroom displays, samples, accessories, etc. We will review cabinetry options, finishes, storage, etc. and discuss your vision, time frame and budget.

2. Presentation & Estimate (free)

About one week after your first meeting, we will show you preliminary 3D/computerized drawings, floor plans and color renderings of your new kitchen. You will also get an estimate for cabinetry and countertop options. We provide these first two expert consultations and initial design preview at no cost to you. Why? We want to earn your confidence — in both our design expertise and the product selections offered.

3. Retainer & Home Measure

If you are ready to move forward with us after the first two complimentary meetings, your designer will ask you to sign a retainer agreement and place a deposit toward your kitchen cabinetry purchase. This allows your designer to visit your home for an on-site measure and release hard copies of your personalized design plans to you and your installer.

4. Finalize Design & Order

After the professional in-home measure, your designer will finesse and complete your design and thoroughly review every aspect of your order. Once you sign-off on your plans, we will submit your order. You will receive a final copy of plans, paperwork, and pricing.

5. Delivery

We will call you when your products arrive in our warehouse to set up a delivery. We will work with you and your contractors to help the installation go smoothly.

5 MINUTE MEASURE

Your Carole designer just needs some basic data about your space to get started. Don't worry, we will visit your home and verify measurements before finalizing the order. **Bring a picture of the current space** if you can, too. Phone or tablet photos are fine!

1. Measure in **INCHES** each **WALL** (not each cabinet), corner to corner.

2. Measure doors and windows (outside casing to outside casing) in **INCHES**.

3. Note the width in **INCHES** of each appliance in the current location (even if you plan to upgrade them).

4. Measure the ceiling height (floor to ceiling) in **INCHES**.

Here is an example:

Your style

Your Carole designer will customize a kitchen design for you in virtually any look/style you choose.

Your investment

We know that budgets vary and so at Carole's, you have choices across a very broad investment range. Our selections cover full-custom, mid-range (semi-custom), and economical contractor-grade options. At any investment level, you will get Carole's great service.

Your time frame

Please plan on about 4-8 weeks from the day you order until the cabinetry arrives in our warehouse (depending on the brand you choose). Your designer will give you a more precise time frame as you finalize the design.

Our promise

The entire team at Carole's is here to support you during your remodeling and building process. Our designers, administrative, and warehouse staff focus on offering our clients an expert team, product education, superb design, and super service.

'Google' us to read reviews from clients or visit our Houzz.com page (look for us under the 'Find Pro' tab).
